Ford Expedition owners have reported 21 problems related to brake abs warning light (under the service brakes category). The most recently reported issues are listed below. Also please check out the statistics and reliability analysis of Ford Expedition based on all problems reported for the Expedition.

*Ford Expedition Brake Abs Warning Light Problems*

5 Common Reasons the ABS Light Comes On There are many causes which could make an ABS light come on. It

doesn't always mean there is a problem with the anti-lock braking system directly. There could also be a problem with other sensors or components that it communicates with as well.

#### *5 Reasons Your ABS Light is On (and What To Do)*

Turn the ignition to the "on" position (the second position) on the ignition. Open your Explorer's hood and loosen the retaining nut on the negative battery cable clamp using a socket wrench and a 10 millimeter socket. Slide the clamp off the negative battery terminal and wait three to five minutes.

#### *How to Reset the ABS Light on Vehicles | It Still Runs*

Step 1: Check ABS Fuse. The abs system is like any other electrical system and is protected by a fuse that can blow if an electrical surge occurs or if the fuse ages. If the fuse is blown and you replace it and it blows again there is a short circuit in the system which is usually the ABS computer or pump motor.

#### *How to Fix an ABS Warning Light On in Under 15 Minutes*
