A monopolist follows the same profit-maximizing rule as a firm in a competitive market: produce until marginal cost equals marginal revenue. As prices go down, the monopolist gains more customers. At the same time, this lowers the revenue from each individual customer, including the existing ones. However, up to a certain point the increased sales volume offsets the revenue loss from the price ...

### Naked Economics: Chapter 10 by Tapan Patel on Prezi

Principles of Economics covers scope and sequence requirements for a two-semester introductory economics course. The authors take a balanced approach to micro- and macroeconomics, to both Keynesian and classical views, and to the theory and application of economics concepts. The text also includes many current examples, which are handled in a politically equitable way.
