The Early Growth and Development Study (EGDS) is a nationwide, prospective study of birth parents and adoptive families aimed at investigating how families can help their children develop to their fullest potential.

*Early Growth & Development Study*

Development typically refers to an increase in complexity, a change from relatively simple to more complicated. Development usually involves a progression along a continuous sequential pathway on which the child acquires more refined knowledge, behaviors, and skills. The sequence is basically the same for all children; however, the rate varies.
