A great silence has settled upon a drowned world. In the final battle of their final war, the massive citysubs Universalis and Population reduced each other to ruins. One lays wrecked on the seafloor. The other, beached and lifeless, litters the island of pristine polar ice it tried to destroy. Pockets of survivors huddle together. On the frigid surface, Ralla Gattley and Thom Vargas cling to life and each other. Below, the soldier Geran Lo fights relentlessly to free trapped and drowning civilians. As they struggle against a world determined to kill them, a new and even more dangerous menace approaches. Undersea Atrophia is the second book in the Undersea Saga.

The novel pits Ted Cogan, a forty-three--year- old surgeon and self-described womanizer, against Hank Madden, a handicapped veteran detective. From the outset it's not clear who is victim and who is victimizer, as the usually dispassionate Madden grapples with his long-suppressed prejudices and his obsession with bringing Ted Cogan to justice at any cost. It all leads up to the most stunning surprise ending since Scott Turow's Presumed Innocent.

Save money, time, and stress by never checking a bag again Have you ever struggled with packing for a trip? You can't decide what you'll need, so you pack for every scenario and take far too much. You struggle to fit everything in your bag, you get stressed lugging it around, and you pay a fortune in airline luggage fees. The Carry-On Traveller will teach you not only how to lighten your load, but how to pack everything you need into a single carry-on-size bag. You can apply these strategies to any trip, whether you are travelling for a week or a year, to hot or cold climates, alone or with kids. By travelling carry-on only, you'll save time at airports, avoid wasting money on checked luggage fees (which are increasingly common), and reduce the stress of hauling bulky bags. It's not an all or nothing approach. Packing light is a learning process, and you might want to take it gradually. Even if you don't travel carry-on only on your next trip, this book will help you pack lighter. "The book gave me some great ideas on where I can pack less and how to pack better. My backpack right now is about a third less full than usual because I got rid of a lot of the 'what if' items I normally bring." Dani Heinrich, GlobeTrotterGirls.com. What you will

learn The basic principles of packing light that you can apply to any trip Strategies to avoid panic packing The best carry-on luggage whether you prefer a backpack or suitcase How to choose the perfect travel wardrobe The electronics you really need How to manage airline liquid restrictions Why how you pack is as important as what you pack The book also includes Male and female packing lists, and how to adapt them for your trip. Interviews with a range of carry-on travellers including a family, fashionista, makeup lover, retiree, artist, and more. Plenty of bonus tips such as the best travel apps, how to keep your gear safe on the road, and the best bank accounts for travel. Access to a packing resources web page featuring exclusive discounts and a downloadable packing list template. "I was having trouble fitting everything in my backpack and having a minor panic attack on how to do it up until I read this book. I gave it another go and I managed to pack it with room to spare!" Caitlin Reilly Why I wrote this book The advice in this book is based on my six years of experience travelling full-time to over 30 countries with just a carry-on backpack. I wrote this book because I believe packing

light is the secret to stress-free travel. I've saved myself money, time, stress, and backache. Most importantly, I've gained freedom-I can pack all my belongings in ten minutes and head off on the next adventure. "I read your book this weekend and could not put it down.You have forever changed my traveling habits." Colette File

It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, Atlas Obscura celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobob tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard

for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, ATLAS OBSCURA revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer.

Anyone can be a tourist. ATLAS OBSCURA is for the explorer.

The former editor of Mashable and cofounder of DominateFund examines the psychological phenomena that captivate our attention—and how we can leverage them to draw and retain attention for our ideas, work, companies, and more. Whether you're an artist or a salesperson, a teacher

or an engineer, a marketer or a parent—putting the spotlight on your ideas, insights, projects and products requires a deep understanding of the science of attention. In Captivology, award-winning journalist and entrepreneur Ben Parr explains how and why the mind pays attention to some events or people—and not others—and presents seven captivation triggers—techniques guaranteed to help you capture and retain the attention of friends, colleagues, customers, fans, and even strangers. Parr combines the latest research on attention with interviews with more than fifty scientists and visionaries—-Facebook's Sheryl Sandberg, film director Steven Soderbergh, LinkedIn CEO Jeff Weiner, magician Jon Armstrong, New York Times bestselling author Susan Cain, Nintendo's Shigeru Miyamoto, founder of Reddit Alexis Ohanian, and more—who have successfully brought their ideas, projects, companies, and products to the forefront of cultural consciousness. The result is an insightful and practical book that will change how you assign jobs to your kids or staff, craft a multi-million dollar ad campaign, deliver your next presentation, attract users to your product, or convince

the world to support your cause.

The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he la-

bored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

In a world flooded and irradiated by a nearly forgotten cataclysm from generations passed, all that remains of civilization clings to life in two war-torn, city-sized submarines. For fifty years, the only peace between them had come from separation. Now, young council woman Ralla Gattley has uncovered mysteries that will bring these two factions face-to-face, initiating a series of events that will forever change their undersea world. She didn't expect to meet Thom Vargas, a bored fisherman and

aspiring drunk who merely wants to climb one rung on the social ladder. Little did he know that single step may well put the fate of the world in his hands.

From the scientist duo behind True or Poo?, their original New York Times best-selling sensation--a scientifically precise, fully illustrated, utterly hilarious guide to animal flatulence. Dogs do it. Millipedes do it. Dinosaurs did it. You do it. I do it. Octopuses don't (and nor do octopi). Spiders might do it: more research is needed. Birds don't do it, but they could if they wanted to. Herrings do it to communicate with each other. In 2017 zoologist Dani Rabaiotti's teenage brother asked her a most teenaged question: Do snakes fart? Stumped, Rabaiotti turned to Twitter. The internet did not disappoint. Her innocent question spawned the hashtag #doesitfart and it spread like a noxious gas. Dozens of noted experts began weighing in on which animals do and don't fart, and if they do, how much, how often, what it's made of, what it smells like, and why. Clearly, the public demands more information on animal farts. Does it Fart? fills that void: a fully authoritative, fully illustrated guide to animal flatulence, covering the habits of

80 animals in more detail than you ever knew you needed. What do hyena farts smell especially bad? What is a fossa, and does it fart? Why do clams vomit but not fart? And what is a fart, really? Pairing hilarious illustrations with surprisingly detailed scientific explanations, Does it Fart? will allow you to shift the blame onto all kinds of unlikely animals for years to come.

From their haunts in the shadowy corner of a bar, front and center at a convenience store, or reigning over a massive mall installation bursting with light, sound, and action, arcade games have been thrilling and addicting quarter-bearers of all ages ever since Pong first lit up its paddles. Whether you wanted a few minutes' quick-twitch exhilaration or the taste of three-initial immortality that came with topping the high score screen, you could get it from the diverse range of space shooters, dot-eating extravaganzas, quirky beat-'em-ups, and more that have helped define pop culture for more than four decades. In Attract Mode: The Rise and Fall of Coin-Op Arcade Games, author Jamie Lendino celebrates both the biggest blockbusters (Pac-Man,

Star Wars: The Arcade Game) and the forgotten gems (Phoenix, Star Castle) of the Golden Age of coin-op gaming, and pulls back the curtain on the personalities and the groundbreaking technologies that brought them to glitzy, color-drenched life in the U.S., Japan, and all over the world. You'll start your journey exploring the electromechanical attractions and pinball games of the early 20th century. Next, you'll meet the earliest innovators, who used college computers and untested electronics to outline the possibilities of the emerging form, and discover the surprising history behind the towering megahits from Nintendo, Sega, and others that still inform gaming today. Then you'll witness the devastating crash that almost ended it all—and the rebirth no one expected. Whether you prefer the white-knuckle gameplay of Robotron: 2084, the barrel-jumping whimsy of Donkey Kong, or the stunning graphics and animation of Dragon's Lair, Attract Mode will transport you back to the heyday of arcade games and let you relive—or experience for the first time—the unique magic that transformed entertainment forever.

Short Sims: A Game Changer explores the design concepts, dialogue, and formatting of interactive simulations. Interactivity is the key to effective educational media in schools, corporations, the military, and government. However, challenges like ineffective linear content or expenses can derail the product. This book provides a proven methodology to guide anyone through the steps of quickly creating highly engaging and responsive content. The process combines decades of research and

implementations with leading organizations (Bill & Melinda Gates Foundation, Harvard Business School Publishing, Visa, State Department) with new tools that have just emerged. Key Features This book provides numerous code examples to illustrate how to put the techniques into practice. It includes expanded introductions to mathematics fundamental to computer graphics and game development. Graphics and physics are covered in introductory overviews. Author Bio Clark Aldrich is an education technology thought leader—the author of six books and developer of patent and award-winning projects. He currently builds custom Short Sims for organizations using a revolutionary methodology he has pioneered, or helps them build their own, through www.shortsims.com. He is also the host of an audio series called Education X Media (www.edbymedia.com) about evolving pedagogy in academics, corporations, and the military. He has been called a "guru" by Fortune Magazine and a "maverick" by CNN. Aldrich and his work have been featured in hundreds of other sources, including CBS, ABC, The New York Times, USA Today, the Associated Press, Wall Street Journal, NPR, CNET, Business 2.0, Business-Week, and U.S. News and World Report. He has written monthly columns for Training Magazine and Online Learning Magazine. Previously, he was the founder and former director of research for Gartner's e-learning coverage. Earlier in his career, he worked on special projects for Xerox' executive team. He also served for many years as the Governor's representative on the education task force Joint Committee on Educational Technology, volunteered on several non-profit organizations aimed at child advocacy, and has served on numerous boards. He earned from Brown University a degree in cognitive science (during which he also taught at a leading environmental education foundation). He grew up in Concord, Massachusetts, and is the ninth great-grandson of Governors John Winthrop and Thomas Dudley, first and second governors of the Massachusetts Bay Colony, and Captain Walter Neale, the first colonial governor of lower New Hampshire. Provides instructions for blending traditional drawing and painting skills with technological advances to create digital art. Provides more than two hundred tips on ways to modify the Windows XP and Vista operating system, applications, and hardware associated with it.

Fresh out of prison, Richie Forman tries to settle back into his life in the Bay Area. By day, he works at a law firm dedicated to freeing innocent men from prison. By night, he makes a living impersonating Frank Sinatra. But then his ex-best friend is found hacked to death in his garage, and Richie becomes the prime suspect. In a murder mystery with the intricacies of a microchip, David Carnoy weaves his characters like a master.

AN INSTANT #1 NEW YORK TIMES BESTSELLER "How To will make you laugh as you learn...With How To, you can't help but appreciate the glorious complexity of our universe and the amazing breadth of humanity's effort to comprehend it. If you want some lightweight edification, you won't go wrong with How To." —CNET "[How To] has science and jokes in it, so 10/10 can recommend." —Simone Giertz The world's most entertaining and useless self-help guide from the brilliant mind behind the wildly popular webcomic xkcd, the bestsellers What If? and Thing Explainer, and What If? 2, coming September 13, 2022 For any task you might want to do, there's a right way, a wrong way, and a

way so monumentally complex, excessive, and inadvisable that no one would ever try it. How To is a guide to the third kind of approach. It's full of highly impractical advice for everything from landing a plane to digging a hole. Bestselling author and cartoonist Randall Munroe explains how to predict the weather by analyzing the pixels of your Facebook photos. He teaches you how to tell if you're a baby boomer or a 90's kid by measuring the radioactivity of your teeth. He offers tips for taking a selfie with a telescope, crossing a river by boiling it, and powering your house by destroying the fabric of space-time. And if you want to get rid of the book once you're done with it, he walks you through your options for proper disposal, including dissolving it in the ocean, converting it to a vapor, using tectonic plates to subduct it into the Earth's mantle, or launching it into the Sun. By exploring the most complicated ways to do simple tasks, Munroe doesn't just make things difficult for himself and his readers. As he did so brilliantly in What If?, Munroe invites us to explore the most absurd reaches of the possible. Full of clever infographics and fun illustrations, How To is a delightfully mind-bending way to

better understand the science and technology underlying the things we do every day.

"Information Systems for Business and Beyond introduces the concept of information systems, their use in business, and the larger impact they are having on our world."--BC Campus website.

Bobby Monks is blowing the whistle on Wall Street, giving middle class Americans the low down on how they're being fleeced of their retirement money—and what they can do about it Every month our financial statements arrive, and every month we glance at them, trying to understand, hoping that we'll come out ahead. But most of us have no idea what's really going on or the costs involved. According to Bobby Monks—who has been a banker and borrower, investor and entrepreneur—financial firms and money managers have complicated the investing process to keep us in the dark, profiting from our ignorance. Having dealt with the financial sector throughout his career, Monks has seen it all. In Uninvested, he reveals how, when, and why the relationship between us and our money managers became corrupt-

ed—and what we can do to fix it. Monks shows how the system works not only against us as individuals but also against society at large. Without our knowledge or approval, our money is diverted into the pockets of CEOs and misappropriated, promoting business practices that contribute to economic inequality, political dysfunction, and environmental woe. Monks' experiences give him a unique perspective on how we got to this point. Drawing on original research and interviews with key figures such as Vanguard founder Jack Bogle, legendary investor Carl Icahn, and former congressman Barney Frank of the Dodd-Frank Act, Monks teaches us how to take back ownership and control of our money. As he writes: Even in the decades preceding the most recent downturn, very few investors enjoyed financial success equal to that of their money managers. Given this, I have long wondered why investors don't pull their money out of the system en masse. I suspect that it is because most feel powerless. Unaware of the implications of their investments and unable to penetrate the excruciating complexity of the system that facilitates them, many seem to seek refuge in their money managers' aura of sophistication, pretense of competence, and projection of certainty. It seems to me that most investors are simply sleepwalking through the investing process. They have become uninvested. When we outsource our investing, we sacrifice control—but not responsibility. My goal in writing this book is to convince you that the best (and only) way to fix this broken system is to awaken a critical mass of engaged investors and recruit them to participate more fully in the investing process.
