Parents in the United States today feel increasing pressure to practice some form of "hyper-parenting," a time- and resource-intensive style of child-rearing also known as helicopter parenting.

Helicopters get their power from rotors or blades. They do not look much like a helicopter, but the rotors blades have an aerofoil shape when spinning, much like the wings of an airplane. This means that as the rotors turn, air flows more quickly over the tops of the blades than it does below which creates the lift required for flight.

Helicopter Experiment Prediction: As the mass on the helicopter's copters increases, the speed taken for the rotors to spin down faster, this is because there will be more downward pull from gravity, as the terminal velocity for a paper helicopter is low. Variables: Independent variable will be the mass that we change throughout the experiment.

[Physics Coursework Paper Helicopter Results Free Essays](#)

Testing: 1) Drop the helicopter from the same height in same manner several times. Observe its behavior and record the time. 2) Add a paper clip on the bottom and repeat the helicopter fall process. 3) Keep adding paper clips, one at a time, to helicopter and drop it after each new paper clip. Observe as you add more and more paper clips.

[Helicopter Experiment - BIOL 151 - SCSU - StuDocu](#)

The Physics of Paper Helicopters . In my physics coursework I intend to study 'paper helicopters'. A paper helicopter is a piece of plain A4 paper that has been folded, so that when dropped, it spins whilst falling to the ground. Below is a picture of one of the helicopters used.

#### Essays on Helicopter. Essay topics and examples of ...

Conclusion Paper Helicopter Coursework To keep the data as consistent as possible, the experiment will be using the same stopwatch, electric scale and paper helicopter each time. Another control would be using 5 paperclips of each with a mass of .7g . Measure each paperclip by placing them (on at a time) onto the electric scale and record.
