New for 2016, a completely updated guide to the Heritage Sites of the Hudson River Valley National Heritage Area. Traveling down the Hudson River, named by Native Americans the river that flows both ways, you discover people, places, and events that made American history. The cultural, historic, and scenic resources of the Hudson Valley are so numerous, so varied, and so compelling that it's no wonder Congress recognized the Hudson River Valley as a National Heritage Area in 1996. The National Park Service called the region the "landscape that defined America" and characterized the valley as "an exceptionally scenic land-

scape that has provided the setting and inspiration for new currents of American thought, art, and history." Its political importance was demonstrated early in our history when the river played a critical role in the Revolutionary War. The many streams and waterfalls of the tributaries of the Hudson River powered early sawmills and gristmills. The river and its landscapes inspired the Hudson River school of painters. Sublime and picturesque paintings by Thomas Cole, Frederic Church, and Asher Durand depicted this unique American landscape for the world to witness. Industrialists and commercial leaders like William and John D. Rockefeller, Frederick Vanderbilt, J. P. Morgan, and Ogden Mills built

their great estates along the Hudson River. The second edition includes completely updated user-friendly design and vibrant photography; heritage site pages that include brief descriptions, contact information, and accessibility site characteristics; and National Park Service Passport Stamp locations with new cancellation stamp pages for your collection. Heritage sites in this guidebook are associated with areas of interest and categorized as must see, best bet, or special interest to make it easy to explore the stories of the Hudson River Valley. Heritage sites are also organized by geography and proximity to make it easy to find heritage sites nearby.

Essentially, *Solar Success* is about using solar energy to reduce

the fossil generated electricity that we use: to reduce one's carbon footprint. Throughout, it stresses the need to reduce what one uses unnecessarily before one thinks about generating more. This can be done by three associated and economically viable approaches: - reduce energy usage by doing things differently - reduce energy usage by using more energy-efficient appliances - change the supply of energy to non-fossil fuel through appropriate technology. The solar energy required is there; 7000 times more energy than the world currently uses is available. It makes every sense to use it and countries worldwide increasingly do. Solar is also affordable. In California, Italy and Japan, solar power now challenges power generated through natural gas and nuclear energy. In Germany, home owners' solar generated surplus fed back into the grid network and all energy generated is paid at close to five times grid electricity's buying cost. Australia's solar take up is high in rural areas that lack grid-connection. Sales of systems that draw from and feed back to the electricity grid (i.e. grid-connect) proved even more successful than expected as installation rebates and feed-in tariffs were initially very generous. In mid 2014 the Australian Federal government virtually ceased paying rebates on the curious basis that the scheme was attracting many more takers than had been expected. There is now however a growing move to go off-grid as electricity prices continue to rise (and feedback payment drop). Knowing what is practicable and what is less practicable with solar enables readers to evaluate what is offered. And to have an often necessary and educated say in the decisions. For those who wish to design and implement systems themselves, *Solar Success* shows how to do it, and how to avoid the traps. However you finance the system, and no mat-

ter where or how you live, follow the guidelines in Solar Success and you will have an economic system that will supply clean and reliable power for years to come.

Negotiation Excellence: Successful Deal Making is written by leading negotiation experts from top-rated universities in the US and in Asia and its objective is to introduce readers to the theory and best practices of effective negotiation. The book includes chapters ranging from: preparing and planning for successful negotiations; building relationships and establishing trust between negotiators; negotiating creatively to create mutual value and win-win situations; understanding and dealing with negotiators from different cultures; to managing ethical dilemmas. In addition to emphasizing the link between theory and practice, the book includes deal examples such as: Renault-Nissan alliance; mega-merger between Arcelor and Mittal Steel; Kraft Foods' acquisition of Cadbury PLC, Walt Disney Company's negotiation with the Hong Kong government; and Komatsu, a Japanese firm's negotiation with Dresser, an American firm. Following the success of the

first edition, the second edition re-emphasizes the spirit of linking theory to practice with two new chapters on emotions in negotiation and the Indian negotiation style.

Buckle up as Douglas Keister takes you for a decidedly retro ride in the world of diminutive travel trailers in *Teardrops and Tiny Trailers*. The demand for vintage trailers-the smaller the better-has risen dramatically in recent years, with the most in-demand trailers being "teardrops," first manufactured in the 1930s and containing just indoor sleeping space and an outdoor exterior kitchen. Also profiled in the book are "canned ham" trailers, whose shape resembles the profile of a can of ham; small-size examples of America's most beloved vintage trailer, the Airstream; miniscule gypsy caravans in Europe; and fiberglass trailers made in Canada. Two hundred color photographs showcase these trailers' sleek exteriors, retro-styled interiors, and, in many cases, the restored classic cars that tow them. *Teardrops and Tiny Trailers*

includes a resource section chock-full of places to locate vintage trailers, clubs to join, and rallies to attend. Photographer/writer Douglas Keister has authored thirty-six critically acclaimed books. His books on classic recreational vehicles include *Ready to Roll*, *Silver Palaces*, and *Mobile Mansions*. In addition, he has authored twenty-five books on architecture, including *Inside the Bungalow*, *Storybook Style*, *Red Tile Style*, *Classic Cottages*, and *Cottages*. Keister also writes and illustrates magazine articles and contributes photographs and essays to dozens of magazines, newspapers, books, calendars, posters, and greeting cards worldwide. He lives in Chico, California.
