ly left of the breastbone. The heart pumps blood through the network of arteries and veins called the ...

Human Heart (Anatomy): Diagram, Function, Chambers ...

The heart is the organ that helps supply blood and oxygen to all parts of the body. It is divided by a partition (or septum) into two halves, and the halves are in turn divided into four chambers. The heart is situated within the chest cavity and surrounded by a fluid-filled sac called the pericardium. This amazing muscle produces electri-

cal impulses that cause the heart to contract, pumping ...

The Anatomy of the Heart, Its Structures, and Functions

The heart is a muscular organ about the size of a closed fist that functions as the body's circulatory pump. It takes in deoxygenated blood through the veins and delivers it to the lungs for oxygenation before pumping it into the various arteries (which provide oxygen and nutrients to body tissues by transporting the blood throughout the body).
