---

Human Settlements and Energy deals with the impact of energy considerations on human settlements planning and development. The book addresses the energy use, consumed mostly by human settlements, and the ways to conserve energy in these habitats. The text reviews the demand for energy, the principal uses of energy, and as the Economic Commission for Europe sees it, the need for human settlements to disconnect from heavy dependence on fast disappearing hydrocarbon fuels.

Human Settlements and Energy: An Account of the ECE Seminar on the Impact of Energy Considerations on the Planning and De-

velopment of Human Settlements, ... 3 - 14 October 1977 (English Edition) eBook: Economic Commission for Europe, Jackson, C. I.: Amazon.nl: Kindle Store

Human settlements, defined in ECE Energy Statistics as "households and other consumers" (including commerce and tertiary activities) absorbed in 1974 36 per cent of the total final energy consumption in the ECE region (see Table 1). The tonnage involved in direct use was about 1,425 million tce (tons of coal equivalent), but in order to make the deliveries of secondary forms of energy possible, another 700 to 800 million tce had to be committed by the energy conversion industries.
