the wavefunction of the initial and final state are constant within the nuclear radius and zero elsewhere, $R(r) = 0$ for $r > R$. (3) The other crucial approximation is to say that the integral over spherical harmonics gives a result on the order of unity. Now we can see that $\int_0^\infty r^2 dr = 3R^3/4$ (4) Using $L = 2$ our radial equation is then
