Knex.js - A SQL Query Builder for Javascript

Using Higher-Order Functions to Build Queries in Knex.js My team has been using Knex.js to build database queries for our latest project. To create increasingly complex queries, we developed a pattern to generate SQL queries using higher-order functions.

If you need to use the knex query builder instead of writing the raw SQL yourself, then you have to convert the results in Knex.-QueryBuilder to a string, and then join multiple queries together.

Knex.js - Reviews, Pros & Cons | Companies using Knex.js

Knex.js is a JavaScript query builder for relational databases including PostgreSQL, MySQL, SQLite3, and Oracle. It can be used with callbacks and promises. It supports transactions and connection pooling. In this tutorial we work with MySQL.

Knex.js vs Slack SQL | What are the differences?
Using Higher Order Functions to Build Queries in Knex.js How to get the full SQL query ? · Issue #619 · knex/knex …

Knex SQL Node.js Tutorial - Learn how to set up a Blog …
Knex cheatsheet

knex.js A SQL query builder that is flexible, portable, and fun to use! A batteries-included, multi-dialect (MSSQL, MySQL, PostgreSQL, SQLite3, Oracle (including Oracle Wallet Authentication)) query builder for Node.js, featuring: Node.js versions 8+ are supported.

Knex.js is a "batteries included" SQL query builder for Postgres, MySQL, MariaDB, SQLite3, and Oracle designed to be flexible, portable, and fun to use.

Knex.js vs Knex.js | What are the differences?
In my latest project, I've been using Knex.js, a SQL query builder

for Node.js. I developed a method of logging the queries executed by Knex.js as well as the execution times for each query. This method can be applied to nearly any application that uses Knex.js, and it uses a few features of Knex.js that I didn't notice immediately, so I thought I'd share this small but useful bit of code.

Knex.js tutorial - programming databases with Knex.js

Flyway vs Knex.js vs Massive | What are the differences?

Calling builder.toSQL() should give you the sql/bindings, but you'd need to then call the query yourself with knex.raw or something. I've got plans to overhaul the entire query construction process so it'd be possible to tap into the construction at any point for cases like this.

Knex.js vs Microsoft SQL Server | What are the differences?

Knex.js is a powerful query builder for SQL DB's and Node.js. Learn how to use it and why it is so powerful in this all inclusive tutorial.

Knex is an SQL query builder for Node.js. This guide targets v0.13.0.

Stop using Knex.js - Gajus Kuizinas - Medium

Knex can be used as an SQL query builder in both Node.JS and the browser, limited to WebSQL's constraints (like the inability to drop tables or read schemas). Composing SQL queries in the browser for execution on the server is highly discouraged, as this can be the cause of serious security vulnerabilities.
