Robby Swift explains how to rig your NeilPryde Freeride sail as quickly and safely as possible, followed by tips on how to tune it for maximum performance, and an overview of the freeride sail range.

#### Neb-sails

Neb-Sails Tuning Guide. The Mast Tuning of the sails always starts by tuning the mast. On a Norlin Mark III, you can use the following system in order to get the mast into the right position. Start with tightening the top shrouds to a good portion of strain (you do not need lower shrouds at all), when the mast is in vertical position.

Trimguide 2.4m R Norlin MKIII version En 0.2 - 021028 Introduction The tuning guide is written to give you the best performance from your North sails. The preparations and settings are those we have found to give the best VMG on a Norlin MKIII. However, there is a lot of useful information even for those sailing another design.

The designed fore-and-aft position of the area of maximum draft depth in sails is usually from 40 to 50% aft from the luff (above). Various factors affect the maximum draft location, but for basic tuning you can ignore this except as specifically addressed later in this guide.
