If you installed using the download on the OOo web site, you can start Writer by typing at the command line: soffice -writer. or swriter. Writer will start and create a new document. To see a list of options you can use when starting Writer at the command line, type: soffice -?

---

### OpenOffice Writer - Starting from the command line

Writer is the word-processing package part of OpenOffice and, not to put too fine a point on the matter, it's a free alternative to the costly and ponderous Microsoft Word. Because the software comes free of charge however, there is no printed manual, so the ever-enterprising publishers O'Reilly have produced one as part of their Community Press series.
