Oracle Application Express (APEX) Patches (4.2, 5.0, 5.1)

It is designed to give delegates practical experience in using Application Express version 5, also known as Apex, for building web-based applications for an Oracle database and websheets for...

Oracle Application Express (APEX) Patches (4.2, 5.0, 5.1) From APEX 18.x onward the concept of patching has become irrelevant, as every release is effectively a full upgrade. Upgrades affecting the first two numbers of the version (4.1 to 4.2, 4.2 to 5.0, 5.0 to 5.1) are done by doing a full installation.

Application Express 5.1 contains two new packaged applications are provided for REST service inte-

gration: REST Client Assistant and Sample REST Services. This article will show how you can integrate an external REST service or an HTTP/JSON data feed into your APEX application - and how the REST Client Assistant will help you with that: All required SQL and PL/SQL code will be generated for you!

If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

One of the most-mentioned new features in Application Express 5.1 are the new Charts based on Oracle JET. JET is targeted at intermediate to advanced JavaScript developers working on client-side applications. It's a collection of open source JavaScript libraries along with a set of Oracle contributed JavaScript libraries that make it as simple and efficient as possible to build applications that consume and interact with Oracle products and services, especially Oracle Cloud services.
