T14 A Leader's Guide to a Successful Restorative Program

Restorative Nursing Program Restorative Nursing Program (RNP) refers to nursing interventions that promote the resident's ability to adapt and adjust to living as independently and safely as possible. This concept actively focuses on achieving and maintaining optimal physical, mental, and psychosocial functioning.

wounds and contractures. But Restorative Nursing

Programs are moving to the forefront under the Patient Driven Payment Model, or PDPM, especially for skilled residents. Under PDPM, providers will be able to capture reimbursement for approximately half of skilled residents if restorative nursing is captured on the MDS.

Why Restorative Matters for SKILLED Residents

OVERVIEW Restorative Nursing is not a new concept Techniques have been taught in nursing school and CNA training programs for decades. Restorative measures are not a separate entity, but should be integrated into routine nursing care Restorative Nursing is based on a belief in the dignity and worth of each individual,
